

iSchool PhD Research Days

Research around Margins, Boundaries and Translations

**April
19-20
2018**

Keynote: Prof. **Lilly Irani**, UC San Diego
Entrepreneurial Citizenship and the
Subsumption of Hope

In our information research, what different worlds do we encounter and how do we navigate, bridge, or deepen the boundaries between them? How do we draw or cross boundaries within our own Faculty? Where and when do we recognize space at the margins?

With the theme of *Research around Margins, Boundaries and Translations*, the Faculty of Information's 2018 PhD Research Days aims to recognize the varied background of our students and faculty, and the plethora of topics and many different fields of our doctoral studies.

**9:30 am - 5:00 pm both days, Keynote April 19
Inforum (4th flr), Claude T. Bissell Building**
